Actuarial Valuation as of January 1, 2010

## Disclosure Statement

---

### **Purpose**

Actuarial computations under Governmental Accounting Standards Board Statement No. 45 (GASB No. 45) are for purposes of fulfilling employer accounting requirements. The calculations reported herein have been performed in accordance with generally accepted actuarial principles and practices, and on a basis consistent with our understanding of GASB No. 45. In preparing this report, we have relied upon information furnished to us by City of Harrisburg. This information includes data pertaining to the Plan, as well as a description of the substantive plan. The information has been reviewed and determined to be reasonable and consistent; however, we have not audited the data or reviewed plan provisions for compliance with IRS or DOL regulations.

Determinations for purposes other than meeting the employer financial accounting requirements may be significantly different from the results reported herein. Accordingly, additional determinations are needed for other purposes, such as judging benefit security at termination or adequacy of funding for an ongoing plan. The actuarial calculations contained in this report are not intended or written to be used, and cannot be used, for the purposes of avoiding penalties under the Internal Revenue Code.

This valuation involves estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Calculations are based on the types of benefits provided under the terms of the substantive plan at the time of the valuation and on the pattern of sharing of costs between the employer and plan members)to that point. Calculations reflect a long-term perspective, so methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets.

### **Benefits Not Included**

Defined contribution benefits and insured benefits under GASB No. 45 paragraph 28, pension benefits accounted for under GASB 27, and benefits for compensated absences under GASB 16 are not included in this valuation.

### **Multiple Year Reporting**

Pursuant to GASB No. 45, this valuation can be used for a multiple year period. As such, this valuation provides all of the actuarial figures necessary to comply with GASB No. 45 over the applicable period. Nonetheless, some non-actuarial figures have been determined based on estimated contributions for the period. These figures may need to be adjusted for actual contributions deposited to the trust or claims paid on behalf of plan benefits.

A new valuation should be performed if, since this valuation, material changes have occurred that affect the results of this valuation, including significant changes in benefit provisions, the size or composition of the population covered by the plan, or other changes that impact long-term assumptions.

Firefighters and Non-Uniformed Employees:

Pre-retirement: RP2000 Mortality Table with ages set back 1 year for males and 5 years for female

Post-retirement: RP2000 Mortality Table

Mortality for Disabled life is based on same mortality for a healthy life 10 years older.

(These tables do not include projected mortality improvements.)

### **Retirement**

Police: Later of age 52 and completion of 20 years of service or age at the valuation date.

Firefighters and Non-Uniformed: Rates of retirement upon eligibility of normal retirement vary by age.

## **Disability**

SOA 1987 Group LTD Table - Males, 6-month elimination

## **Percent of Eligible Retirees Electing Coverage in Plan**

100% of Police, Firefighters, and Non-Uniformed Management employees are assumed to elect coverage upon retirement. 100% of Non-Uniformed Union employees who retire at age 60 or older after completion of 20 years of service are assumed to elect coverage. For all other Non-Uniformed Union employees, 75% are assumed to elect coverage upon retirement. 100% of vested former Police and Firefighters are assumed to elect coverage at age 52 and 100% of vested former Non-Uniformed Management and Union employees are assumed to elect coverage at age 65. 100% of all employees are assumed to elect life insurance coverage.

## **Percent of Eligible Retirees Who Smoke**

50% of all employees are assumed to be smokers.

## **Percent Married at Retirement**

65% of Police, Firefighters, and Non-Uniformed Management (hired prior to 1/31/08) employees are assumed to be married and have a spouse covered by the plan at retirement. 30% of Non-Uniformed Union employees and Non-Uniformed Management (hired after 2/1/08) employees are assumed to be married and have a spouse covered by the plan at retirement.

## **Spouse Age**

Wives are assumed to be two years younger than their husbands.

## **Non-spouse Dependents**

Non-spouse dependents are assumed to cease coverage upon attainment of age 23.

## **Per Capita Claims Cost**

Making use of weighted averages for various plan designs, the per capita cost for medical and prescription drug is based on the expected portion of the group's overall cost attributed to individuals in the specified age and gender brackets. Dental, vision and life insurance costs are assumed to equal premiums. The resulting costs are as follows:

Age	Medical <sup>1</sup>		Prescription Drug <sup>2</sup>	
	Males	Females	Males	Females
45-49	\$4,382	\$6,329	\$1,867	\$2,697
50-54	\$5,803	\$7,153	\$2,473	\$3,048
55-59	\$7,069	\$7,484	\$3,012	\$3,189
60-64	\$9,224	\$8,597	\$3,931	\$3,664
65+	See note below		\$5,033	\$4,689

<sup>1</sup> For retirees, the medical claims costs above vary by factors ranging from 0.939 to 1.043 depending on the benefits plan the retiree is enrolled in. After attainment of age 65, medical claims costs are assumed to equal the premium of the Medicare Supplement Plan the member is enrolled in or will be enrolled in.

<sup>2</sup> For retirees, the prescription drug claims costs above vary by factors ranging from 0.882 to 1.056 depending on the benefits plan the retiree is enrolled in.

### **Retiree Contributions**

Retiree Contributions are assumed to increase at the same rate as the Health Care Cost Trend Rate.

### **Health Care Cost Trend Rate**

7.5% in 2010, decreasing by 0.5% per year to 5.5% in 2014. Rates gradually decrease from 5.3% in 2015 to 4.2% in 2099 and later based on the Society of Actuaries Long-Run Medical Cost Trend Model.

### **Actuarial Value of Assets**

N/A - The plan is unfunded.

### **Actuarial Cost Method - Entry Age Normal**

Under the Entry Age Normal Cost Method, the Normal Cost is the present value of benefits allocated to the year following the valuation date. Benefits are allocated on a level basis over the earnings of an individual between the date of hire and the assumed retirement age. The Accrued Liability as of the valuation date is the excess of the present value of future benefits over the present value of future Normal Cost. The Unfunded Accrued Liability is the excess of the Accrued Liability over the Actuarial Value of Assets. Actuarial gains and losses serve to reduce or increase the Unfunded Accrued Liability.

<sup>1</sup> Other Postemployment Benefits (**OPEB**) is postemployment benefits other than pension benefits. OPEB includes postemployment healthcare benefits, and all postemployment benefits provided separately from a pension plan, excluding benefits defined as termination offers and benefits.

<sup>2</sup> Annual OPEB Cost is the amount recognized as the expense in the employer's financial statements.

<sup>3</sup> Net OPEB Obligation is the cumulative difference between the annual OPEB cost and the employer's contributions to the plan. It is the amount that appears as a liability on the employer's financial statements. Please note that if a plan is not funded, the contribution is equal to the amount paid for benefits.

<sup>4</sup> Note: These amounts are estimates only. These amounts may be adjusted for actual contributions deposited or benefit payments made during the fiscal year. In addition, a new valuation should be performed if there have been significant changes in benefit provisions, the size or composition of the population covered by the plan, or other changes that impact long-term assumptions.

<sup>5</sup> For plans that do not track actual claims and expenses separately for retirees, employers should be aware that the entity's costs for retirees generally exceeds premium amounts to the Trust or Insurance Company. GASB 45 requires the liabilities reflect this "hidden subsidy." Correspondingly, employers should reduce amounts otherwise paid for active employees. For example, if the retirees' Annual Pay-As-You-Go cost is \$1,000,000 but the total premium paid for retirees is \$750,000 for retirees, this means the hidden subsidy valued is \$250,000. As such, the active employees' premium costs should be reduced by \$250,000.
