Re: City of Harrisburg Postemployment Benefits Plan

Dear Bruce:

I am attaching a copy of the actuarial valuation as of January 1, 2018, which has been prepared in accordance with Governmental Accounting Standards Board Statement No. 75 (GASB 75) for your fiscal year January 1, 2018, to December 31, 2018.

GASB 75 Background

The purpose of GASB 75 is to have employers identify the promises they make with respect to postemployment benefits and to reasonably quantify their cost. In the most general sense, employers must attribute the future cash flow for postemployment benefits over the employee's working lifetime.

GASB 75 does not have any impact on your annual operating budget unless a decision is made to separately fund the liability. The key accounting figures are:

- The "OPEB Expense", which is the expense reported on the income statement.
- The "Net OPEB Liability", which is the liability reported on the year-end balance sheet.

Actuarial Valuation

The results presented in the actuarial valuation will be used in preparation of your financial statements. At the beginning of the actuarial valuation you will find a Summary of Plan Provisions outlining the benefits valued in the report, as well as a section describing the Actuarial Assumptions and Methods used. The GASB 75 reporting section will provide the following:

- Summary of key results
- Changes in the Net OPEB Liability from the prior year
- Deferred Outflows/Inflows of Resources and the sensitivity of the Net OPEB Liability under key assumption changes

- Development of OPEB Expense and disclosure of future recognition of Deferred Outflows/Inflows of Resources
- Detailed amortization schedule of Deferred Outflows/Inflows of Resources bases
- Schedule of Required Supplementary Information

Results

Pursuant to GASB 75, an actuarial valuation can be used over a two-year period. The figures in this report are reflected as of the measurement date for the specified fiscal year and are based on an actuarial valuation date or rolled forward from an actuarial valuation date. A new valuation should be performed if, between the actuarial valuation date and measurement date, material changes have occurred that affect the results of this valuation, including significant changes in benefit provisions, the size or composition of the population covered by the plan, or other changes that impact long-term assumptions.

The OPEB Expense and Net OPEB Liability figures that are provided in the valuation are based on estimated contributions. Because your plan is unfunded, the estimated contributions are simply equal to the estimated benefit payments. Your accountant will likely accept our estimates as the best available figures for these determinations; however, there are three instances when you may need to adjust the accounting numbers for use in your financial statements:

You choose to fund the benefit: If you choose to formally fund the benefit in an irrevocable trust or equivalent arrangement under GASB 75, you will need to reflect both contributions and benefits paid from general accounts.

You prefer to use actual benefit payments for an unfunded plan: You may reflect actual benefit payments rather than our estimate. However, in order to use actual benefit payments, we believe retiree claim experience would need to be tracked separately from active employee claim experience. Simply totaling premiums paid on behalf of retirees would not be appropriate because the premiums do not reflect the hidden rate subsidies.

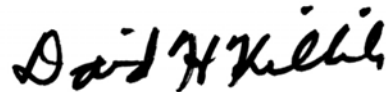

You prefer to use an updated estimate: The estimates in this valuation are based upon plan participation as of the valuation date, reflecting retirements and other status changes expected to occur after the valuation date. You may prefer to revise the estimated benefit payments based on actual plan participation as of a date after the valuation date, for example, based on the number of actual retirees during a later fiscal year.

In any of the above cases, the actuarial components of the valuation report remain intact and there is no need to have another valuation prepared. This is simply an accounting adjustment that you or your accountant can make.

Please do not hesitate to contact me to discuss the report or any questions you or your accountant might have.

With best regards,

Yours sincerely,

David H. Killick, FSA, EA, MAAA

Calculations for GASB No. 75 Reporting

City of Harrisburg Postemployment Benefits Plan
Actuarial Valuation as of January 1, 2018 for Fiscal Year Ending December 31, 2018
Disclosure Statement

Purpose

Actuarial computations under Governmental Accounting Standards Board Statement No. 75 (GASB No. 75) are for purposes of fulfilling employer accounting requirements. The calculations reported herein have been performed in accordance with generally accepted actuarial principles and practices, and on a basis consistent with our understanding of GASB No. 75. In preparing this report, we have relied upon information furnished to us by the City of Harrisburg. This information includes data pertaining to the Plan, as well as a description of the substantive plan. The information has been reviewed and determined to be reasonable and consistent; however, we have not audited the data or reviewed plan provisions for compliance with IRS or DOL regulations.

Determinations for purposes other than meeting the employer financial accounting requirements may be significantly different from the results reported herein. The funded status, measured by comparing the Accrued Liability against the Actuarial Value of Plan Assets, is not an appropriate measure for assessing the sufficiency of the plan assets to cover the estimated cost of settling the plan's benefit obligations upon plan termination nor is it appropriate for measuring the need for, or the amount of, future contributions. Accordingly, additional determinations are needed for other purposes, such as judging benefit security at termination or adequacy of funding for an ongoing plan. The actuarial calculations contained in this report are not intended or written to be used, and cannot be used, for the purposes of avoiding penalties under the Internal Revenue Code.

This valuation involves estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Calculations are based on the types of benefits provided under the terms of the substantive plan at the time of the valuation and on the pattern of sharing of costs between the employer and plan members to that point. Calculations reflect a long-term perspective, so methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets.

Benefits Not Included

Defined contribution benefits and insured benefits under GASB No. 75 paragraph 11, pension benefits accounted for under GASB 68, and benefits for compensated absences under GASB 16 are not included in this valuation.

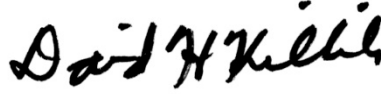

Multiple Year Reporting

Pursuant to GASB No. 75, an actuarial valuation can be used over a two-year period. The figures in this report are reflected as of the measurement date for the specified fiscal year and are based on an actuarial valuation date or rolled forward from an actuarial valuation date. Some figures have been determined based on estimated contributions for the period. These figures may need to be adjusted for actual contributions deposited to the trust or claims paid on behalf of plan benefits.

A new valuation should be performed if, between the actuarial valuation date and measurement date, material changes have occurred that affect the results of this valuation, including significant changes in benefit provisions, the size or composition of the population covered by the plan, or other changes that impact long-term assumptions. If roll forward procedures have been used, this report reflects any necessary adjustments to the interest rate as of the measurement date.

Discount Rate

3.16% Based on S&P Municipal Bond 20-Year High Grade Rate Index at January 1, 2018.

Salary

5.00%

Withdrawal

Police: Table D-1: Rates of withdrawal at selected ages:

| Age | Rate | Age | Rate | Age | Rate |
|-----|---------|-----|---------|-----|---------|
| 20 | 5.5000% | 35 | 2.5000% | 50 | 0.0000% |
| 25 | 5.0000% | 40 | 1.0000% | 55 | 0.0000% |
| 30 | 4.0000% | 45 | 0.5000% | 60 | 0.0000% |

Firefighters and Non-Uniformed Employees: Rates of withdrawal vary by years of service.

| Firefighters | | Non-Uniformed Employees | |
|------------------|----------|-------------------------|----------|
| Service | Rate | Service | Rate |
| Less than 1 year | 13.0000% | Less than 1 year | 20.0000% |
| 1 year | 10.0000% | 1 year | 20.0000% |
| 2 years | 7.0000% | 2 years | 15.0000% |
| 3 years | 7.0000% | 3 years | 12.0000% |
| 4 years | 6.0000% | 4 - 5 years | 7.0000% |
| 5 years | 5.0000% | 6 years | 6.0000% |
| 6 years | 4.0000% | 7 - 9 years | 5.0000% |
| 7+ years | 3.0000% | 10+ years | 3.0000% |

Mortality

IRS 2017 Static Combined Mortality Table for Small Plans

Incorporated into the table are rates for annuitants projected 7 years and rates for non-annuitants projected 15 years using Scale AA to reflect mortality improvement.

Disability

SOA 1987 Group LTD Table - Males, 6-month elimination

Retirement

Police: Later of age 52 and completion of 20 years of service or age at the valuation date.

Firefighters and Non-Uniformed: Rates of retirement upon eligibility of normal retirement vary by age.

| Firefighters | | Non-Uniformed Employees | |
|--------------|-------------------|-------------------------|-------------------|
| Age | Rate ¹ | Age | Rate ¹ |
| 50 | 20.0000% | 65 | 35.0000% |
| 51-54 | 10.0000% | 66-74 | 15.0000% |
| 55 | 20.0000% | 75+ | 100.0000% |
| 56-57 | 25.0000% | | |
| 58-59 | 30.0000% | | |
| 60 | 40.0000% | | |
| 61-62 | 50.0000% | | |
| 63 | 60.0000% | | |
| 64 | 70.0000% | | |
| 65 | 80.0000% | | |
| 66+ | 100.0000% | | |

¹ Rates are adjusted by adding 5% (or 10% for ages 60-62) for the year in which the member is first eligible.

City of Harrisburg Postemployment Benefits Plan
Actuarial Valuation as of January 1, 2018 for Fiscal Year Ending December 31, 2018
Actuarial Assumptions and Methods (2 of 3)

Percent of Eligible Retirees Electing Coverage in Plan

100% of Police, Firefighters, and Non-Uniformed Management employees are assumed to elect coverage upon retirement. 100% of Non-Uniformed Union employees who retire at age 60 or older after completion of 20 years of service are assumed to elect coverage. For all other Non-Uniformed Union employees, 75% are assumed to elect coverage upon retirement. 100% of vested former Police and Firefighters are assumed to elect coverage at age 52 and 100% of vested former Non-Uniformed Management and Union employees age 60 or older are assumed to elect coverage at age 65. For all other Non-Uniformed Union vested former members, 75% are assumed to elect coverage at age 65. 100% of all employees are assumed to elect life insurance coverage.

Percent of Eligible Retirees Who Smoke

50% of all employees are assumed to be smokers.

Percent Married at Retirement

65% of Police, Firefighters, and Non-Uniformed Management (hired prior to 1/31/08) employees are assumed to be married and have a spouse covered by the plan at retirement. 30% of Non-Uniformed Union employees and Non-Uniformed Management (hired after 2/1/08) employees are assumed to be married and have a spouse covered by the plan at retirement.

Spouse Age

Wives are assumed to be two years younger than their husbands.

Non-spouse Dependents

Non-spouse dependents are assumed to cease coverage upon attainment of age 26.

Per Capita Claims Cost

Making use of weighted averages for various plan designs, the per capita claims cost for medical and prescription drug is based on the expected portion of the group's overall cost attributed to individuals in the specified age and gender brackets. Dental, vision, and life insurance costs are assumed to equal premiums. The resulting costs are as follows:

| Age | Medical ¹ | | Prescription Drug | |
|-------|----------------------|----------|-------------------|---------|
| | Males | Females | Males | Females |
| 15-24 | \$2,111 | \$4,753 | \$295 | \$665 |
| 25-29 | \$2,540 | \$6,339 | \$355 | \$886 |
| 30-34 | \$2,873 | \$6,430 | \$402 | \$899 |
| 35-39 | \$3,483 | \$6,678 | \$487 | \$934 |
| 40-44 | \$4,256 | \$7,192 | \$595 | \$1,006 |
| 45-49 | \$5,464 | \$7,892 | \$764 | \$1,103 |
| 50-54 | \$7,237 | \$8,919 | \$1,012 | \$1,247 |
| 55-59 | \$8,815 | \$9,333 | \$1,232 | \$1,305 |
| 60-64 | \$11,502 | \$10,721 | \$1,608 | \$1,499 |
| 65+ | See note below | | \$2,059 | \$1,919 |

¹ For retirees, the medical claims costs above vary by factors ranging from 0.961 to 1.093 depending on the benefits plan the retiree is enrolled in. After attainment of age 65, medical claims costs are assumed to equal the premium of the Medicare Supplement Plan the member is enrolled in or will be enrolled in.

Retiree Contributions

Retiree contributions are assumed to increase at the same rate as the Health Care Cost Trend Rate.

Health Care Cost Trend Rate

6.0% in 2018, and 5.5% in 2019 through 2021. Rates gradually decrease from 5.4% in 2022 to 3.8% in 2075 and later based on the Society of Actuaries Long-Run Medical Cost Trend Model.

Actuarial Value of Assets

Equal to the Market Value of Assets

Actuarial Cost Method - Entry Age Normal

Under the Entry Age Normal Cost Method, the Normal Cost is the present value of benefits allocated to the year following the valuation date. Benefits are allocated on a level basis over the earnings of an individual between the date of hire and the assumed retirement age. The Accrued Liability as of the valuation date is the excess of the present value of future benefits over the present value of future Normal Cost. The Unfunded Accrued Liability is the excess of the Accrued Liability over the Actuarial Value of Assets. Actuarial gains and losses serve to reduce or increase the Unfunded Accrued Liability.

Changes of Assumptions

The discount rate changed from 3.71% to 3.16%. The trend assumption was updated. Mortality was updated so all groups have the same mortality using the IRS Static Combined Table for Small Plans.

Changes of Benefit Terms

¹Each year's loss (or gain) is recognized over a closed period, using the average of the expected remaining service lives of all active and inactive employees that are currently receiving a benefit or may be eligible to receive a benefit in the future.

²These figures are based on estimated benefit payments. These amounts may be adjusted for actual benefit payments made during the year.
